

What makes us different from the rest?

We offer a unique 6 month guarantee for all our work!

If you have any issues with the pests we treat over the 6 month warranty period we'll treat them again for free - guaranteed!

Safety for your Family and Pets

We often receive calls from clients asking what they need to do with young children and pets when we carry out treatments. Here are the most common questions and our answers:

Will I need to keep my pets away from the house during spraying?

If the pets are fine to be inside while I am spraying the outside then they are safe at home.

Will the chemical be dangerous for my family including young children?

As long as the windows and doors are closed while the outside of the home is being sprayed everyone and everything is safe inside the home.

How long before its safe for my pets to go outside?

If you have requested ant and spider treatment, then I usually carry out the ant treatment first, starting with the dogs area. By the time the rest of the block has been sprayed and the spider treatment has been done it is normally safe for the pets to go back out in their area.

If only an ant treatment has been requested, and you have pets, then I use a chemical that is the most pet friendly and again I start with the pets area first, sometimes your pet may have to stay inside for a bit longer until the chemical has dried depending on the day. I will let you know any precautions when I have completed the treatment.

We have a selection of chemicals to choose from for most situations and we always make sure that your family and pets are safe.

If you have a question, please call us and we will put your mind at rest.
